ITEM DESCRIPTIONS

ALL LICENSES ARE FOR A SINGLE TOURNAMENT

- **WEBSITE REGISTRATION.** This item provides a **standard** website for a single tournament. Customization is available for an additional fee. The website registration option is priced based on the expected size of your tournament which roughly correlates to the expected traffic on the website. An additional RUSH fee may be applied for websites requiring a turn-around time of less than 7 days (excluding weekends and holidays).

NOTE: The website only handles registration. If you plan to use Joy of Tournaments for tabulation, you need to select a PC software license in addition to the website. Registration and tabulation options are purchased separately.

What if I don't know how many entries to expect? Select the category that represents your best guess. If you prepay, an additional invoice will be sent if you underestimate your entries or a refund will be issued if you overestimate. There is no penalty for a bad estimate; however, *the ultimate website fee will be based on **actual** entries.*

- **PC TABULATION SOFTWARE.** There are two versions of the PC software. You will need ONE license (choose between standalone or network) for each tournament. The PC software handles tabulation of the tournament (sectioning, pairing, room assignments, judge assignments, sweepstakes tabulation, etc.). You will not need a PC software license if you plan to use another solution for tabulation (e.g. cards, TRPC, TRIEPC, etc.) You may use the tabulation software with or without the website registration option (the two options may be purchased separately). Available only for Windows 2000 or Window XP.

Standalone – this version includes all of the software necessary to run a tournament on a single 'standalone' station. Some tournaments may use multiple standalone stations. For example, one standalone station may handle the debate events and a separate standalone station all of the individual events. One license may be used on multiple stations but the stations will not communicate with each other (even if they are on a network or are able to share files).

Network – this version is designed for larger tournaments. All of the features available in the standalone version are included. Additionally, this version allows tabulation on multiple machines simultaneously with each machine aware of the changes made on the other machines.

NFL District – this version is designed for use at NFL district tournaments. Both the traditional up/down system and the California plan are supported.

- **SUPPORT OPTIONS.** All packages include **limited** support via email. This support is on an 'as available' basis only. Email support has **no guaranteed turnaround time** (although email will generally be answered same day). No support options are available on Sunday.

PREPAID: allows a discounted rate for calls over a 24-hour period. Unused calls are nonrefundable. This option requires that payment is **received** prior to use and must be *scheduled in advance* to assure availability. Premium tournament coverage provides 36 hours of support during a 2-day tournament MON-SAT (typically from noon on Friday thru midnight Saturday). Each day of support is purchased separately.

BY-THE-CALL: If a prepaid support option is not selected, *all calls received for support or training will be billed at the BY-THE-CALL rate.* The charge per call will be determined by the time of the call (Standard or Extended Hours). Availability of BY-THE-CALL support is **not guaranteed**. *BY-THE-CALL support receives lower priority than any PREPAID option and is provided on an 'as available' basis only.* BY-THE-CALL support has no guaranteed turnaround time and is not available on Sunday.
